ThemeXpert is a small team of passionate developer and designer who have one common goal - to make very best Web 2.0 templates and extensions our customers dream about and to continually raise the standards of the products.

We develop Joomla templates and extensions on LAMP stack and cook them nicely with Photoshop, Bootstrap and jQuery to serve oven hot and fresh by Continuous Integration & Care. As we are a small team, you will get support directly from the people who write code and know ins-out about the product.

Unique Design

- Themexpert provides unique and handcrafted responsive design which ensure your site content displays beautifully and intuitively on all web-browser. Each theme comes with layered source PSD which give you the ability to adapt and customize.
